

MOBILE RACK

A wide ranging product line-up that is also applicable for special environment such as freezer storage, clean room application. Holding special items such as dangerous and heavy objects, even cylindrical shaped items. IHI offer appropriate logistics solution to meet customers needs.

Increase the Storage capacity 2 to 2.5 times.

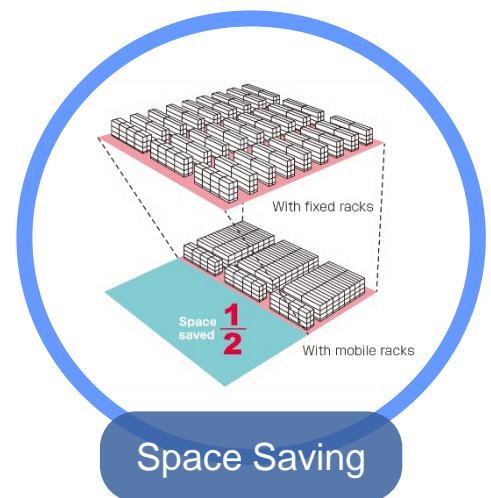

The racks can be kept in close contact under normal situations and they can be moved to create a passage only when performing tasks to free up the dead space. This enables the storage capacity to increase 2 to 2.5.

Easy and Safety Operation

Only simple operation is required when moving racks. Equipped with a safety device, it will automatically stop in the event where people or objects touched the rack, thus supporting a safe operation.

Delivery Record in Thailand

Rack runner and Rail-less rack runner in frozen room

Mobile Rack Rack Runner

Double and Triple Safety Functions

Safety is the first priority when handling cargo in warehouse. Rack runners are equipped with numerous safety features to ensure the safety of the workers and the surrounding.

Compatible for Various Storage Solutions

The automated racks are "all-round" and can handle loads of a wide range of sizes, weights, and shapes. They are also compatible with various storage methods and environment.

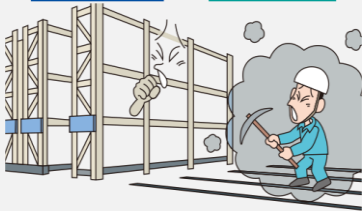

Rail-less Rack Runner

Urethane wheels protect the floor from the moving racks and promote usage of rail-less moving racks which are flexible to layout changes.

Dust-free

Rail-less

Rail Type

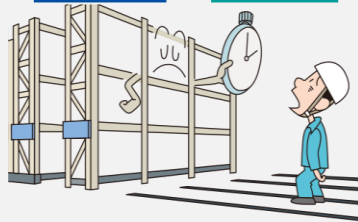

Rest assured that installation does not require rail construction causing dust hazards. Implementation is suitable for factories/warehouses dealing with delicate materials such as food products, etc.

Shorter Construction Period

Rail-less

Rail Type

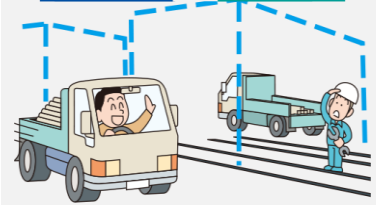

Installation takes a short period to complete with little work required in its construction tasks and methods. Customers can plan post-construction schedules without concern.

Easy Removal

Rail-less

Rail Type

No rails mean it is easy to remove/change the floor plans. It will also not damage the floor at all - it can be installed in leased warehouses and other existing buildings without concern. This opens up various options for many customers.

Available for various industries

Refrigerated/Frozen Type

Cantilever Type

Flat-base type
