# IHI De-palletizing Robot System

The Worlds First De-palletizing Robot Controlled by Deep-Leaning AI

Object Recognition by Deep-Leaning AI

- ☑ **Simplification of pre-registration for starting operation.**

- ☑ **30% improved de-palletizing capability sizes.**

- ☑ **Supports mixed-load pallets.**

Available Single & Mixed Load Pallet

Single load pallet   Mixed load pallet

Various Control Method

Independent Mode

Safety handling is available without pallet information after initial setting.

Collaboration Mode

To realize fast handling, AI system select suitable transportation speed itself by using pallet information.

IHI *Realize your dreams*
